Materials were circulated among conference participants and were distributed to libraries of Polish technical universities (120 copies). Conference materials were also uploaded (open access) to Section of Construction Projects Engineering Committee of Civil Engineering of Polish Academy of Science website: http://sipb.sggw.pl/Dokumenty/Materialy_konferencyjne_IPB_2015.pdf.

Final partners meeting in Poland, 14-17 October 2015, Warsaw.

Two specific events were organized for final disseminations of products. These events took place at the UMINHO on the 21th October 2015, with roughly 25 participants - construction engineers and managers.

Sessions comprised three parts:

- On the first part, a brief presentation of the project and partners was done, followed by the introduction to each module with reference to previous projects conducted by the same project partners that gave rise to the manuals supporting the presentations developed in this project.
- On the second part, an overview on the organization logics of the presentations has been addressed as this lays the basis for a possible MSc project to be conducted by the project team in each university represented.
- Finally, a short presentation of parts of modules has been done in order to give attendants an idea of the type of materials covered.

Opinions were very favourable in both sessions. The possibility of creating an international studies programme has deserved the interest of participants as this would be an excellent opportunity to develop their knowledge while attending the courses in an international environment. Opinions on the presentation contents and methodology have also been favourable. It should be noted that the participants in these session could manipulate the manuals that were made available for reference before and during the presentation session. Moreover, some of the participants evidenced that they already knew some of the manuals as these have been disseminated through the technical community over the last years.

POST-CONTRACTING DISSEMINATION ACTIVITIES:

Presentation of the project ideas and results and discussion at the meeting with young construction engineers - MSc. Students of the School of Civil Engineering (Universitat Politècnica de València), Valencia, Spain, 5th November 2015, approx. 10 participants.

Presentation of the project results at AEEBC (European Association of Construction Experts) General Assembly in Riga, Latvia, 6th November 2015. Approx. 40 participants from EU construction industry. Project was also presented and discussed at AEEBC Academic Seminar - approx. 15 participants from EU construction industry and technical universities.

The MBAIC project and the results were presented in international scientific conference "Contemporary Issues in Business, Management and Education 2015" held on 12–13 of November, 2015 in Vilnius Gediminas Technical University, Faculty of Business Management.

The conference was organized in cooperation with Riga Technical University (Latvia), University with Finance and Management in Warsaw (Poland), Cracow University of Economics (Poland), Tallinn University of Technology (Estonia), University of Applied Sciences Upper Austria, Kavala Institute of Technology (Greece), University of Pardubice (Czech Republic), Polytechnic University of Valencia (Spain), Tomas Bata University in Zlin (Czech Republic), Nicolas Copernicus University (Poland). Scientists from 11 countries presented their articles in this conference.

The presentation of MBAIC project

MBAIC project team prom Vilnius Gediminas Technical University presented MBAIC project and achievements in presentation entitled "Perceptions of construction industry to managerial competences in construction: Lithuanian Case".
